VIJIN GOVIND C K

SENIOR PRODUCT & INTERACTION DESIGNER | MOBILE UX | SYSTEMS THINKING

Bengaluru, India | +91 8848367045 | vijingovind@hotmail.com

Portfolio: vijingovind.com | LinkedIn: linkedin.com/in/vijingovind | Product: theyyamthirra.com

PROFILE

Product and interaction designer with 6+ years of UX experience, including independent work since 2018, across mobile-first consumer products, enterprise SaaS, and AI-enabled platforms. Translate ambiguous, multi-step problems into coherent journeys, intuitive interaction models, and polished visual interfaces. Led global enterprise UX initiatives, collaborated across engineering and business teams, and independently launched a consumer discovery product for users in India.

DESIGN EXPERTISE

Strategy and systems: Systems thinking, problem framing, UX strategy, product discovery, early-stage iteration, stakeholder storytelling, information architecture

Interaction and craft: Mobile-first UX, user journeys, task flows, interaction design, visual design, design systems, responsive UI, high-fidelity prototyping

Collaboration and validation: Engineering partnership, design reviews, user feedback, UAT, usability evaluation, developer handoff, AI-assisted prototyping

PROFESSIONAL EXPERIENCE

AB InBev GCC India | Product Designer / Tech Compliance • ***Aug 2023 – Present***

- Led UX and interaction design for MICS360, a multi-module governance platform spanning self-assessments, control testing, issue management, evidence, monitoring, and role-based user workflows.
- Mapped complex journeys and information architecture; designed responsive interfaces, prototypes, and reusable UX patterns during modernization from Microsoft Power Platform to an Azure-hosted web application.
- Partnered with engineering, compliance, and regional stakeholders to clarify product requirements, present design decisions, refine workflows, and incorporate UAT feedback across global teams.
- Designed Power BI and application reporting experiences that clarify data-dense control-testing information; explored human-reviewed AI assistance for evidence and compliance workflows.

Intelous AI | Consultant Product Designer • ***2022 – 2023***

- Designed AI-focused SaaS journeys and analytics experiences, converting ambiguous product requirements into user flows, interactive prototypes, high-fidelity visual UI, and consistent interface patterns.
- Collaborated with technical and business stakeholders to simplify multistep workflows and explore solutions before implementation.

LinkDOT | Co-Founder & Chief Design Officer • ***2021 – 2023***

- Helped define the product vision and interaction strategy for a 0-to-1 Web3 reputation and contribution platform; shaped user journeys, information architecture, visual direction, and prototype experiences.
- Worked with founders and engineers on scope, feature prioritization, design trade-offs, and communicating product concepts through prototypes.

Experion Technologies | UI/UX Designer • ***2021 – 2022***

- Designed mobile EV-charging experiences, automotive interfaces, and ERP workflows; delivered task flows, wireframes, polished UI, and reusable patterns for engineering handoff.

JAS Innovations | UI/UX Designer — Short-Term EdTech Project • ***2020 – 2021***

- Took an e-learning product from 0-to-1 concept through design and development collaboration; focused on course discovery, navigation, responsive interactions, and prototypes.

Self-Employed | Freelance Product & UI/UX Designer • *2018 – 2021*

- Designed independent client and startup web/mobile experiences, including consumer discovery and shopping journeys, UX architecture, wireframes, responsive UI, prototypes, and developer handoff.

Salesfuse Marketing Services Pvt. Ltd. | Research Analyst → Software Engineer • *Sep 2016 – Jul 2018*

- Progressed from market and product research into software development, contributing to SaaS, marketing automation, and technical workflows.

SELECTED PRODUCT WORK

TheyyamThirra | Founder & Product Designer • *2026 – Present*

- Built and launched a mobile-first Theyyam cultural-event discovery product with calendar-based exploration, regional venue and schedule details, contributor submissions, and community verification/cancellation states.
- Designed a V2 guide-request journey with visitor context, language preference, explicit data-sharing consent, guide assignment, and request tracking (V2 in development).

TempleAddress | Product Design Contributor — Discovery & UPI/QR Concepts • *Project*

- Designed mobile-first service discovery, listings, and request journeys; explored provider UPI ID/QR information presentation and booking interactions through early UX concepts and prototypes.

VASS Systems | Co-Founder & Product Design Advisor

- Supported discovery, design consulting, early MVPs, and technology delivery across emerging web products and service experiences.

TOOLS & EDUCATION

Design and technical: Figma, FigJam, Adobe XD, Illustrator, Photoshop, Power BI, HTML/CSS, Bootstrap, basic React, Git/GitHub, AI-assisted prototyping

Education: PG Diploma, Communication Design — Kerala State Institute of Design (2018–2021); B.Tech, Electronics & Communication Engineering — University of Calicut (2010–2013); Diploma, Electronics Engineering — Technical Education, Kerala (2007–2010)
